RETURN OF HIGHWAY FUNDS USED FOR SAN FRANCISCO-OAKLAND BAY BRIDGE TO STATE HIGHWAY FUND AND FUTURE EXPENSE TO BE PAID FROM TOLLS

Supervisor Merkley moved the adoption of the following resolution:

WHEREAS, the California Toll Bridge Authority is to meet in the near future to consider plans for refinancing the San Francisco-Oakland Bay Bridge; and

WHEREAS, State Highway funds have been expended for the maintenance, operation and insurance of the Bridge since its opening in accordance with Section 30606 of the Streets and Highways Code, such expenditures having directly reduced funds available for improvement of State Highways in County Group 1, the 45 Northern Counties of California; and

whereas, the amount of loss of funds to the State Highway Fund caused by this diversion had already reached approximately $12,000.00 on June 30, 1951, and an additional $1,750,000 for this purpose was budgeted for the 1951-1952 Fiscal Year; and

WHEREAS, the average cost per mile of maintenance, operation and insurance of the San Francisco-Oakland Bridge has been many times the average cost per mile of maintaining ordiary State Highways as is shown at page 3297 of the Senate Daily Journal of June 13, 1951; and such excessive costs have directly benefitted users of the Bridge who should pay them from tolls; and

WHEREAS, funds are desperately needed to improve State Highways in the Northern Counties of California as is evidence by the fact that the State Division of Highways reports that deficiencies in the Northern Counties under 1950 conditions would cost $1,541,397,600 for correction but it is estimated that less than $675,000,000 will be available to meet those deficiencies by the end of the 1962 fiscal year; and

WHEREAS, these accumulated highway deficiencies are responsible for inconvenient and inefficient motor vehicle transportation and the killing maiming of Californians on the highways; and

WHEREAS, these deficiencies in the Northern Counties are partly traceable to the practice of diverting money from the State Highway Fund to meet the operation, maintenance, and insurance expenses of the San Francisco-Oakland Bay Bridge; and

WHEREAS, the original legislative grant of authority to use state highway funds for maintenance, operation and insurance of the bridge was a departure from previously established policy and was hastily passed by the Legislature in less than two weeks after introduction, in response to urgent pleas of the Governor and representatives of Alameda and San Francisco Counties as an emergency measure in time of serious unemployment in 1933, upon terms dictated by the Reconstruction Finance Corporation, which terms, it was said when efforts were made to amend the bills, could not be changed without jeopardizing the promised loan for the bridge; and

WHEREAS, the original arrangement for the payment of the Bridge expenses out of State Highway funds was allegedly required as a precautionary measure to assure successful financing in the fact of an unknown future in a time of business depression and unemployment, but this arrangement has served its purpose, and, viewed in retrospect, was never acutally necessary, and the injustice done to the Northern Counties in the matter of highway funds can now be corrected without jeopardizing the rights of any individual; and

WHEREAS, in the 1951 regular session of the Legislature the State Senate dealt with this problem and by a vote of 35 to 1 passed a bill providing for repayment of past advances from the State Highway Fund for operations, naintenance and insurance as well as future expenses to be paid from tolls; and

WHEREAS, there seems to be general agreement that future operation and insurance expenses of the Bridge should be paid from the proceeds of tolls, which policy would accord with sound principle; and

WHEREAS, sound principle does not change and it would be equally as sound to repay money previously advanced from the State Highway Fund for these expenses and the expenses of physical maintenance as it would be to pay all of these costs in the future; and

WHEREAS, the fact that tolls will be ample to retire the Bridge Bonds long ahead of the necessary dats is in part attributable to the fact that maintenance, operation and insurance expenses have been met with other funds; and

WHEREAS, users of the Bay Bridge will pay no more if all expenses advanced from the State Highway Fund are repaid now than if all such expenses had been paid from tolls in the first instance in accordance with sound fiscal policy; and

WHEREAS, highway users in the Northern Counties have for many years foregone the highway improvements that would have been made had it not been for this special aid to users of the Bay Bridge;

NOW, THEREFORE, BE IT RESOLVED by the Board of Supervisors of the County of Yolo, State of California, that the California Tll Bridge Authority be respectfully requested to include in any plan for refinancing the San Francisco-Oakland Bay Bridge a provision to repay to the State Highway Fund for expenditure on state highways in County Group No. 1 all moneys that have been used for maintenance, operation and insurance expenses in accordance with Sections 30605 and 30606 of the Streets and Highways Code; and

BE IT FURTHER RESOLVED that the California Toll Bridge Authority be requested to include in any plan for refinancing a provision to pay from tolls future expenses of the Bridge, including all costs of physical maintenance as well as operation and insurance costs; and

BE IT FURTHER RESOLVED that the County Clerk is directed to send a copy of this resolution to the Honorable Earl Warren, Chairman, and to each of the members of the California Toll Bridge Authority.

WHEREAS, in the aforesaid ordinance it is provided by section 3, Subdivision (b) that the required improvements of streets and roads to be dedicated shall be in accordance with the "Rules for Improvement of Roads and Streets to be Dedicated" as established by the Board of Supervisors and of record in the minutes of said Board in resolution form;

NOW THEREFORE, BE IT RESOLVED AND ORDERED, by the Board of Supervisors of Yolo County, sitting in regular session, that the following "Rules for the Improvement of Streets and Roads to be Dedicated" be adopted:

1. Roads will be grated full width of right of way dedicated, unless otherwise approved by the County Engineer. The centerline grades and ditch grades must be approved by the County Engineer.

2. All drainage structures and culverts must be placed. Where curb and gutter is not placed by the subdivider and where a valley drain is not practicable for driveway purposes, a note shall be shown on the tentative map and on the final map, that driveway pipes shall be furnished and placed by the property owner, and shall be of a size approved by, and placed to the line and grade set by the County Engineer. All culverts shall be of galvanized corrugated metal (unless otherwise allowed) and the size to be placed and the guage to be used shall be approved by the County Engineer.

3. The subdivider will cause to be placed at least six inches compacted thickness of "untreated rock base" at least thirty-two feet (32 ft.) wide. In certain cases where the subgrade is poor and/or the drainage is poor, the County Engineer may require an additional thickness of base in the form of a select material, such as sand or additional base rock. In cases where the subdivider is installing curb and gutter, the base rock shall be placed "curb to curb". At intersection with existing roads or at intersections within the subdivision, the rock section shall be widened so that the outside edge of the rocked section shall be a radius of not less than fifteen feet at intersections. this rock will be placed on a true or even subgrade which has been provided with proper "chokers" to prevent rock from being lost into the gutters.

The minteral aggregate shall consist of broken stone, crushed gravel, natural angular or rough surfaced stone, or a combination thereof. The Aggregate shall be free from adobe, vegetable matter, loam, or other deleterious substances, and shall be of such quality that it will compace thoroughly when watered and rolled to form a well-bonded, firm base.

The aggregate shall be uniformly graded from coarse to fine, and the percentage composition by weight as determined by laboratory sieves shall be as follows:

SIEVE SIZE	PERCENTAGE PASSING
2"	100%
1½"	90-100%
3/4"	50-90%
No.4	25-90%
No.200	3-11%

When the mineral aggregate does not contain sufficient binder material to bond properly under the action of watering and rolling, there shall be added to and incorporated in it a binder material consisting of rock screenings, disintegrated granite or other cementaceous material.

4. After the untreated rock base has been placed, it shall be brought to a true and even surface, and, by means of watering and rolling, a finished and compace surface must be obtained. There shall then be placed a prine coat of SC1 grade liquid asphalt approximately ¼Gal. per Sq. Yd.

Next a surface course of Plant Mix Surfacing shall be placed two inches (2") in thickness, for the full width of the base rock in place. The Plant Mix Surfacing shall be to the specifications for the Dense Graded Mixture, 3/4 inch maximum as provided in Section 28 of Standard Specifications of California State Division of Highways, dated January, 1949. In lieu of the plant Mix Surface, a two inch (2") thick surface course of bituminus macadam may be used. Specifications for the macadam shall be submitted to, and approved by, the County Engineer before being used.

In special country road type subdivisions where a majority of the lots are an acre or more in area, there may be subsituted for the Plant Mix Surfacing a surface course of a double armor coat to be placed for a didth of twenty-two feet (22') to a specification, to be approved by the County Engineer.

If this surfact treatment is allowed, the full width of base rock shall be given a penetration treatment before armor coating of approximately ¼ gallon per Sq. Yd. of liquid Grace SC2 in addition to the prime coat of SC1 already in place.

As provided by Section 3, Subdivision (b), of Ordinance No. 175, the subdivider may post surety bonds guaranteeing the compliance with the above regulations, if acceptance of the subdivision is desired before completion of the work required. If the subdivision is submitted after November 1st and prior to March 1st, the oiling as required by paragraph four of the "Requirements" may not be done, but surety bonds must be given to insure this works' being done when weather conditions permit, but in no case may this oiling be done before the first day of March following the date of filing the subdivision. Such oiling must be completed before the first day of September following.

REQUEST OF SACRAMENTO-YOLO PORT DISTRICT FOR FEDERAL BUDGET OF $10,000,000 FOR DREDGING DEEP WATER CHANNEL APPROVED

Supervisor Johnston moved the adoption of the following resolution:

WHEREAS, the Sacramento River Deep Water Channel project authorized by Congress, July 24, 1946 will widen, deepen and straighten Yolo County water ways with the deep water channel terminating in Lake Washington turning basin in Yolo County, such new channel being 15 miles shorter than the present crooked shallow draft route; and

WHEREAS, the Sacramento-Yolo Port District created by a vote of the people April 15, 1947, includes Supervisorial District No. 1 of Yolo County; and

WHEREAS, the State of California, on July 7, 1947, approved and endorsed the deep water channel project as authorized by Congress and instructed the Sacramento-Yolo Port District to cooperate with Federal, State and other governmental agencies to bring about early construction of the project; and

WHEREAS, the State of California indicated its interest in the project by appropriating $750,000 for rights of way contingent on Federal Government appropriating construction funds and the Port District voting necessary bonds for local financing, all of which conditions have been met; and

WHEREAS, Port District bonds amount to $3,750,00 were voted November 4, 1947, thus making total $4,500,000 local funds for participation in the project; and

WHEREAS, the Port District has purchased 1400 acres of land for rights of way, has constructed a large grain elevator, constructed four (4) miles belt railroad, together with higyway pavement and various other facilities involving a total expenditure of $1,746,130; and

WHEREAS, 2000 acres of Yolo County Farm Land contiguours to the deepwater turning basin has been reserved for spoil dispoal areas and cannot be used for warehouse and industrial sites until the channel is dredged and spoil material placed on this land; and

WHEREAS, the total expenditure of the Corps of Engineers for advance planning and for dredging approximately 7,000,000 yards of material is$2,428,823, with an estimated 70,000,000 yards of material yet to be dredged; and

WHEREAS, the Dredging Association of California has 20 idle dredgers, 5 of which could complete this dredging within 2 years time; and

WHEREAS, Yolo County is a highly productive agricultural area with a number of diversified food processing plants, all of which use water transportation extensively in reaching large population centers on or near the Atlantic, Gulf and Pacific Coast ports and also foreign and world wife markets; and

WHEREAS, the Interstate Commerce Commission recently permitted intercoastal carriers to cancel transhipment terminal rates by water from Sacramento to Atlantic coast ports for the reason that their ocean going vessels cannot navigate the present river channel; and

WHEREAS, this freight rate cancellation adds an additional freight transportation cost to these food products which must ultimately be borne by the consumer,

NOW, THEREFORE, BE IT RESOLVED, that the Board of Supervisors of Yolo County declare that the public welfare requires completion of the deep water channel at the earliest possible date so that deep sea ships can call at the Lake Washington turning basin and there leave our Yolo County and other Northern California tonnage, thus restoring Pacific Coast base rates to all ports of the nation and to foreign ports; and

BE IT FURTHER RESOLVED, that the Board of Supervisors support the request of the Sacramento Yolo Port District that a minimum of $10,000,000 be included in the Federal Budget early in 1953 in order that the Corps of Engineers may execute a continuing contract with the end that dredging be quickly accomplished at the lowest cost to the Federal Government: and

BE IT FURTHER RESOLVED, that the Clerk of this Board forward certified copies of this resolution to Governor Earl Warren, Senators William F. Knowland and Richard M. Nixon, also to Congressman Elect John E. Moss and Congressman Clair Engle.
